

Do you know the difference between Medicare & Medicaid?

Knowing the best option to receive healthcare support could save you and your family thousands of dollars.

Most Americans are confused about the difference between Medicare and Medicaid. If you or your loved one is considering applying for coverage through either of these government programs, take time to understand the differences.

Medicare

- A nationwide, federal program
- Designed to be an optional insurance program for those over 65 years of age
- Covers costs like a commercial insurance program
- Does not cover long-term needs

Medicaid

- A state and federal program
- Designed for low-income people with limited financial resources
- Covers out-of-pocket costs not typically covered by traditional insurance
- Covers long-term needs

If you or a loved one is looking to get coverage through Medicare, Medicaid or both, reach out to a Cariloop Care Coach so you can get support every step of the way.

Cariloop is your caregiver support benefit provided at no cost by your employer. To connect with a Care Coach visit your employer's landing page. Email: helpme@cariloop.com Call: 972-325-5836
